

eTutoring: Help students achieve your learning objectives

ohiolink.edu/etutoring

Since 2010, the eTutoring Collaborative has been providing reliable academic support for undergraduate students across the state. The program is part of OhioLINK and supported by the Ohio Department of Higher Education.

The OhioLINK eTutoring Collaborative offers help for undergrads, including College Credit Plus students, from trained tutors on a user-friendly online platform at no cost to your students. Tutors are scheduled for evenings and weekends when your institution's local academic support center is closed. Supplementing your local institution's tutoring services with eTutoring services offers students more choice and flexibility in finding academic support.

Students have two options for academic assistance:

online tutoring

Students work with trained tutors during drop-in sessions in a variety of subjects. eTutoring tutors work flexible schedules seven days per week, making it easier for your students to get help that fits their busy schedules. See below for the list of subjects in which eTutoring is available.

OR

online writing

eTutoring offers asynchronous guidance for written assignments. This is not editing or proofreading. Reviewers can assist students at any stage of the writing process to address common issues in college-level writing assignments, e.g., organization, structure, citations, grammar, and writing mechanics.

ETUTORING HAS HELPED MORE THAN **30,000** STUDENTS SINCE 2010

eTutoring tutors know their subjects

Some of our tutors teach on your campus. Some are exceptional students. Others are retired professionals who want to “give back” to students studying in their field. All know their subject areas and have completed rigorous online eTutoring-specific training before being placed on the eTutoring schedule. Hours and specific subjects may vary based on the tutor’s availability.

Subjects may include

- Algebra
- Anatomy and Physiology
- Astronomy
- Calculus
- Chemistry
- Computer Science
- Math
- Nursing Math
- Physics
- Organic Chemistry
- Statistics
- Writing

Participating Schools for Academic Year 2024–2025

- Belmont College
- Bowling Green State University
- Cincinnati State Technical and Community College
- Defiance College
- Edison State Community College
- Kent State University
- Lakeland Community College
